

**INSTRUCTION**

# DOCUMENT SETUP

**If a brushes set is required to work with the action**

Make sure you have installed the brushes.

Check your brush adjustment before you hit the play button to run the action. Generally, it must be setup as follows:

- Brush type** : Anything
- Mode** : Normal
- Opacity** : 100%
- Flow** : 100%

**If a patterns set is required to work with the action**

Make sure you have installed the patterns.

Please setup your document correctly before running an action as follows:

**RGB color mode**

Setup your photo in RGB color mode  
To set this: Go to **Menu Bar**, then select **Mode > RGB Color**

**8 bits/channel**

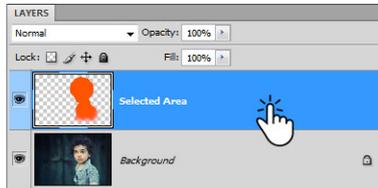

Setup your photo in 8 bits  
To set this: Go to **Menu Bar**, then select **Mode > 8 Bits/Channel**

**72 ppi or greater**

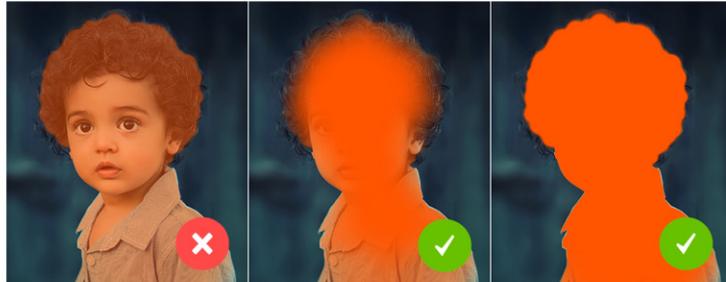

Use a high resolution photo, at least 72 ppi.  
To check this: Go to **Menu Bar**, then select **Image > Image Size**

If brushing is required before running the action to create the effect

**Brushed layer.** Make sure layer 'Selected Area' is selected while brushing

**Brush opacity.** Make sure the area that you brush is not transparent

**Brushed area.** Make sure the area that you brush is large enough. Please refer to the preview image on product page to ensure this
